

BioLine

The bioline is a time line, showing both your life and history. The bioline will have two parts. One part (top or bottom) will highlight your life and the other part of the line will show historical events, both world and/or local. For every news event, you must make a comment on the student life line. If you have a picture of Tiananmen Square, you must comment on what you were doing, or your thoughts at that time. The last picture will be a current picture and your thoughts about your life, and/or history.

Use the following websites to research important dates in your life:

- <http://timelines.ws/>
- <http://timelines.ws/>
- <http://www.scopesys.com/anyday/>

You can include such events as:

- When you were born
- First day of school
- Birth of a sibling
- A broken bone

Do not use actual photographs. Scan and print them or make copies.

Do not copy and paste information from the internet. Any evidence of directly copied material will result in a failing grade. The material must be paraphrased!

Neatness is not incongruent with good work! ☺
