Pharmaceutical Technician

Ermina Kasumovic

Dr. Ermina Kasumovic

Remember when you were a child and you wanted to become a doctor or lawyer. Did you succeed? Well, I met one person who did. On March 21, 2035 I had the privilege of speaking to one of the world's leading pharmaceutical technicians, Dr. Ermina Kasumovic. Since she graduated from Duke University in 2016, her career accomplishments are many. Some of her accomplishments include winning the Nobel Prize and being featured on the cover of Science magazine.

Interviewing Dr. Kasumovic was a pleasure. I asked her about her life's goals and whether or not she plans on continuing her career. She replied by saying that most of her life's goals have been accomplished except one. With Jonas Salk as her role model, she hopes that in her near future she will find a medicine to cure a disease. Whether or not she will continue with her career, Ms. Kasumovic stated that even though it's exciting only time will tell.

Reminiscing about the past 19 years of her life Dr. Kasumovic remembers the day she got her Ph.D. "I felt like I was on top of the world," she stated, "My life's goal had been accomplished and I hope that many more people can say the same." Dr. Kasumovic believes that no one can succeed without a little bit of help. She stated, "When I was younger many people talked to me and pushed me to follow my dream. Now that I am where I've always wanted to be, I feel that I couldn't have done it without them."
